Project Updates

DHS launched the Provider Enrollment function in April 2013. This portion of the system went into production prior to the MMIS go-live date to give providers adequate time to re-enroll in the new system. Approximately 500 individuals have participated in DHS-sponsored training on the provider enrollment system, and over 1,500 providers have initiated the enrollment process.

DHS is working with the primary system vendor, Xerox Corporation, on a revised work plan for the completion of the project. The planned go-live date was October 1, 2013; however, DHS is anticipating the go-live date will shift to the second quarter of calendar year 2014. DHS does not anticipate that this change in the final implementation date will result in increased cost to the state; the current contract provides for damages resulting from missing the October 1, 2013, go-live date.

If you have any questions, I would be happy to address them at this time.
